EDUCATION

Sri Eshwar College of Engineering	B.E., CGPA: 8.1 (up to 6th sem)	2023 – 2027
Ayira Vaisya Higher Secondary School	HSC, 86.5%	2022 – 2023

INTERNSHIP

Prompt Infotech

2025

- Developed foundational knowledge of computer networking, including TCP, UDP, IPv4/IPv6, DNS, the OSI model, subnetting, and core networking protocols.
- Built a strong understanding of cybersecurity fundamentals, including the CIA Triad (Confidentiality, Integrity, Availability), common types of cyberattacks, malware concepts, phishing techniques, and identification of malicious/fake URLs.
- Gained hands-on exposure to foundational Linux concepts and command-line environment fundamentals.

PROJECTS

SupportNest – Business AI Support Platform

2026

[GitHub: github.com/Vishwa-6/ai-support-bot](https://github.com/Vishwa-6/ai-support-bot) | [Live: ai-support-bot-zeta.vercel.app](https://ai-support-bot-zeta.vercel.app)

- Designed and built a Micro-SaaS AI-powered customer support platform that lets businesses deploy their own knowledge-based chatbot without engineering effort.
- Each business gets a unique chatbot link and QR code for instant, mobile-first customer access, cutting response time and manual query handling.

FinOps Sentinel – Cloud Resource & Spend Monitoring Platform

2026

[GitHub: github.com/Vishwa-6/AI-Cloud-Cost-Detective](https://github.com/Vishwa-6/AI-Cloud-Cost-Detective)

- Developing a platform that continuously analyzes cloud resource usage and spend patterns to help organizations detect anomalies, underutilized resources, and misconfigured settings before they escalate into larger issues.
- Generates AI-driven, actionable recommendations for each flagged issue, reducing the manual effort needed to audit usage reports and interpret cloud billing data.
- Provides a live, real-time dashboard so teams can track spend trends and resource health as they happen, improving visibility and supporting faster, data-driven infrastructure decisions.

Cloud Security Monitoring & Incident Response System

2025

- Engineered a real-time cloud security monitoring solution that continuously analyzes AWS audit logs to detect security threats and misconfigurations.
- Automated incident response with severity-based alerting (low/medium/high) via email and Jira ticketing, accelerating threat detection and response time.
- Planned enhancement: integrating AWS GuardDuty ML models to further improve detection accuracy.

CERTIFICATIONS

Networking Basics Cisco Networking Academy	2026
Introduction to Cybersecurity Cisco Networking Academy	2026
Python Programming Basics GUVI	2023
Cambridge Linguaskills Business – English Proficiency B1 Cambridge English	2026
AWS Certified Cloud Practitioner AWS	2026

TECHNICAL SKILLS

Programming: Python, Bash

Cloud Computing: AWS (EC2, S3, Lambda, IAM, API Gateway, DynamoDB, CloudWatch, VPC, SNS, NACL, CloudTrail, GuardDuty), boto3

Networking & Security: Computer Networks (TCP/IP, DNS, OSI Model, Subnetting and Protocols), Cybersecurity Fundamentals (CIA Triad, Malware, Phishing)

Operating System: Linux

Core Concepts: Operating Systems, Data Structures & Algorithms, OOPS, DBMS

Tools: Git, GitHub, Postman
